

Important Update: Maxtec Instructions-for-Use (eIFU) Website Now Live

September 30, 2025

Dear Valued Customer,

At Maxtec, we are committed to providing you with the most accurate product information. We are moving all Instructions-for-Use (IFU) and Service Manuals to an online web portal for streamlined access to the most up-to-date information.

Starting September 29, 2025, we will begin to transition all Maxtec Instructions-for-Use and Service Manuals to be available exclusively through our [eIFU website](#). Printed IFUs and Service Manuals will be phased out and no longer included in product packaging going forward. This change helps eliminate the risk of outdated information and ensures you can quickly access the most current resources anytime. No changes have been made to the IFU content itself, only the method of access.

NOTE: *This change does not apply to private labeled products and devices that do not have Instructions-for-Use.*

A link to the [eIFU website](#) is available across the following pages on maxtec.com:

- **Product Pages** – within the “Documents” sidebar on all applicable product pages
- **[Regulatory Documents](#)** – located under “Resources & News”
- **Homepage Footer** – shortcut located under “Resources”

Key Products Impacted:

- [Maxtec Medical Monitors & Analyzers](#)
- [Maxtec Air-Oxygen Mixers & Blenders](#)
- [Maxtec Flow Meters](#)
- [Maxtec Patient Care Stands](#)
- [EyeMax 2 Phototherapy Mask](#)
- [Maxtec Industrial Analyzers](#) & [Maxtec Scuba Analyzers](#)

Thank you for your continued trust in Maxtec. To access Maxtec's Regulatory documents, [click here](#).

Thank you,
Maxtec Quality Department
