

Safer, smoother ride.

Better gas mileage.

Longer tire life.

Woohoo!

Nitrogen: It Makes Tires Happy

The airliners we fly, the stock cars we race and even the shuttle we fly into space all benefit from the use of nitrogen-filled tires. The technology is readily available and it's time the everyday driver benefits from the use of nitrogen-filled tires in his/her automobile. Running under-inflated tires is a problem for many consumers and nitrogen tire inflation can provide the solution. Nitrogen tire inflation will allow tires to perform better, last longer and provide superior fuel economy all while maintaining a more constant pressure than regular air-filled tires.

Maxtec analyzers have been designed with you in mind.

Our analyzers are the most affordable of their class making them an excellent solution for nitrogen analysis in any application. With a reputation for quality and innovation, Maxtec makes analyzers that are known for defect-free operation even under tough shop conditions. With a less than 90 second response time in a compact, high performance package, Maxtec leads the industry in N₂ tire analysis.

Handi+

- Overmold for extra protection
- Small, convenient & portable
- Auto-off
- 24 month warranty
- Disposable at end of sensor life

MaxO₂+

- Comfortable handheld design
- Impact resistant & drip proof
- Large 3 digit LCD display
- 24 month warranty
- Replaceable sensor & batteries

Part Numbers

MaxO ₂ +A Nitrogen (Internal Sensor)	R217P67
MaxO ₂ +AE Nitrogen Nitrogen (External Sensor)	R217P66
MaxO ₂ +A Fast Response.	R217P65
Handi N ₂	R218P05
TireCheck Adapter	R218P18
