## Our Commitment to Safety: A Note About COVID-19

Dear Valued Customer,

We are reaching out to inform you of measures we are taking to protect our employees and customers in light of the COVID-19 (Coronavirus) outbreak. For our employees, we are taking every possible precaution to protect our team by limiting travel, being flexible with employees working from home, and ensuring increased sanitary measures while stressing optimal hygienic practices in our facility.

For our customers, there are many Maxtec products that play a major role in fighting COVID-19. We have seen a large increase in orders from countries currently affected by COVID-19. Products that have seen an increase are our MaxVenturi, flow meters, oxygen analyzers and our wide variety of air/O<sub>2</sub> blenders. We are doing everything possible to adjust our inventory to fill that demand. If you anticipate a large order of any of these Maxtec devices, please reach out to our team as soon as possible to provide your forecast and/or orders. This will help us to hopefully avoid any delays in getting products to you.

Please contact your Maxtec Sales Representative with any additional questions.

Kind Regards,

Maxtec Marketing
