## Maxtec Hose Fitting Change Notification

Dear Valued Customer,

This letter is to inform you that Maxtec is in the process of making a change to a product you purchase. Maxtec has recently observed an increase in demand for our hoses. In an effort to ensure our customers receive the best service possible, we have added an additional supplier for the hose fittings and adapters. Using this additional supplier will alleviate risks of supply issues and allow Maxtec to better meet demand for hoses going forward. There are 4 different hose fittings and one adapter affected by this change. **The list of affected products is attached.** These new fittings and adapters have the same fit, function, performance, and material as the existing fittings and adapters, but they have a slightly different look (the attached photos show a side-by-side comparison of existing fittings/adapters and the new fittings/adapters).

Effective 45 days following the date of this notification, Maxtec will be incorporating both our existing fittings/adapters and these additional fittings/adapters into our hoses. Going forward, we will use both fitting/adapter versions in our hoses and customers can expect to receive shipments that include either version. We apologize for any inconvenience this may cause. Please contact your Maxtec Sales Representative with any questions or concerns **by April 30, 2021.**

**AFFECTED PRODUCTS:****Products with AFFECTED ADAPTER (see corresponding photos attached)**

PRODUCT NAME	PART NUMBER
COILED HOSE, 15' OXYGEN CHEMETRON CONN	R127P38
COILED HOSE, 10' DUAL CHEMETRON CONNECT	R129P18
