SUNMED ACQUISITION ANNOUNCEMENT OF FLOCAP AND MAXCAP

SunMed is excited to announce the acquisition of MaxCap Reg (item# R500P30) and FloCap (item# R500P21) from Maxtec; effective Monday, February 25, 2019. The addition of these Maxtec ETCO₂ products will enhance SunMed's respiratory portfolio and allow for new product configurations combined with SunMed's resuscitation bag line.

MaxCap and the FloCap are well known for their long life and bright color change from purple to yellow with the presence of CO₂, indicating proper tube placement during intubation.

Attaching between the endotracheal tube and resuscitation bag, MaxCap Reg offers a 360-degree view of the level of CO₂ that no other single-use CO₂ indicators have been able to accomplish. The pediatric and neonate versions of MaxCap are anticipated to receive 510K clearance in June, 2019.

FloCap features a spinner "flow detection" that identifies end of exhalation, which can help prevent breath stacking and associated health implications during resuscitation. The FloCap can be used with both mask and intubated patients to assist the caregiver to recognize the patient's exhaled gas.

Effective immediately, all orders for MaxCap Reg and FloCap should be routed through SunMed Customer Care (800-433-2797, info@Sun-Med.com). Additionally, all payments for current invoices for MaxCap Reg and FloCap products should be sent to SunMed at 2710 Northridge Dr., Grand Rapids, MI 49544.

For more information about these products, please contact Adam Preisach (661-713-2808, apreisach@Sun-Med.com) at SunMed.

A handwritten signature in black ink that reads "Adam Preisach".
